

SENSORS | TEST | CONTROL instrumentation

Scotland & Offshore Systems
8-9 September 2010, AECC, Aberdeen

PRESS RELEASE

For immediate release

Instrumentation Scotland & Offshore Systems, 8 - 9 September 2010

"This is a successful event, bringing the Industry together enabling useful networking and sharing of new technologies".

Karin Jones, Emerson Process Management Ltd

Trident Exhibitions is pleased to announce that its biennial Instrumentation Scotland and Offshore Systems exhibition at the Aberdeen Exhibition and Conference Centre on 8th and 9th September 2010 was considered a great success – as exhibitors will testify!

"This was a well organised exhibition at the perfect venue. A good mix of exhibitors and visitors resulted in a positive enthusiasm throughout the two days. Overall a great event and well organised".

Mr Gerrard Smyth, Manager High Torque UK

Located in the heart of the Offshore industry in Aberdeen, the exhibition brings together the many companies who supply products and services specific to the offshore industry in addition to others representing renewable energy, processing, power generation, paper, distilling, water and waste, and marine engineering in north east Scotland.

Visitors to this show will be able to see all the latest technological innovations, new systems and products from the leading suppliers to this industry. Visitors will also benefit from a varied programme of free workshops & seminars covering many different topics presented by experts in their field.

"Best PR Electronics show attended so far for quantity and quality of contacts. Perfect opportunity to introduce our new product range".

Mr Lee Montague, Country Manager, PR Electronics Ltd.

Gail Downham is the Instrumentation Scotland Show Manager and says 'one of our key objectives for the show was to bring together exhibitors and potential customers. This was an excellent way to network in an informal environment. I believe we certainly achieved that. Face-to-face discussions and demonstrations allowed both visitors and exhibitors the chance to understand each other's requirements and act on them'.

"Overall a good selection of enquires. 80% offshore related with interesting new projects to follow up and with good potential - Good opportunity to meet existing contacts. Very satisfied".
Paul Griffiths Commercial Manager ESI Technology Ltd

The event was also fully supported by the Institute of Measurement & Control, Instrumentation Magazine, Roustabout and Platform magazines.

"Well organised and happy to have attended this event. Good enquires. Looking forward to the 2012 event."

Hutoxi Sarkari, Client Support Specialist, Invensys (UK) Ltd
